5/2	The Ministry needs to identify a relationship between rainfall over a river basin and the water level in a particular river. This advance information needs to be passed on to the downstream States and areas immediately whenever the level in the river/the rain fall increases beyond a cut off level.	Central Water Commission has proposed development of rainfall based flood forecasting in consultation with IMD, which would have information of water levels in rivers at its selected sites, on the basis of rainfall forecasts issued by IMD.	**06.09.2016**	**FM**	Does not pertain to NWDA
