

CONTENTS REPORT

Para no.	Description	Page No.
1	Introduction	
1.0	General	1
1.1	Himalayan rivers development	2
1.2	Peninsular rivers development	2
1.3	Proposed link canals between Mahanadi and Cauvery as per	2
1.3.1	Brief description of nine link system as per the NPP	3
1.4	Aim of the link project and description of the works	9
1.5	Location of project area	12
1.6	Communication facilities	12
1.7	General climatic conditions of the states and project area	13
1.8	General topography, physiography and geology of the project area	14
1.9	Population	18
1.1	Occupation	19
1.11	Natural resources	19
1.11.1	Water resources	19
1.11.2	Land resources	19
1.11.3	Agriculture	20
1.11.4	Mineral wealth	22
1.11.5	Industry	22
1.11.6	Tourism	23
1.11.7	Scriptural importance	23
1.11.8	Culture & people	24
1.12	Land use and socio-economic aspects	24
1.12.1	Cropping pattern	24
1.12.2	Socio economic aspects	25
1.12.3	Drought prone areas	25
1.12.4	Ground water	26
1.12.5	Water quality	26
1.13	Choice of the project	28
1.13.1	Conveyance between Godavari (Inchampalli) - Krishna	30
1.13.2	Piped conveyance between Janampet and Nagarjunasagar	31
1.13.3	Project planning and optimisation of benefits	33
1.14	Stages / phases of development of link project	34
1.15	Fitment of the scheme in overall development of the region	3

Para no.	Description	Page No.
1.16	Intimation to other development authorities regarding the scheme	35
1.17	Public announcements and public hearings	35
1.18	Interlinking of the scheme with neighbouring schemes	36
1.19	Inter state / international aspects	36
1.20	Cost and benefits of the scheme	36
1.20.1	Cost of the project	36
1.20.2	Benefits from the project	38
1.21	Public cooperation and participation	40
1.22	Provision for domestic and industrial water supply	40
1.23	Methodology	40
1.23.1	Survey & investigations	41
1.23.2	Special studies by other Agencies	41
1.23.3	Technical studies	42
1.23.4	Clearances required	44
1.23.5	Organisation of chapters	45
2	Physical features	
2.0	General	45
2.1	Geographical disposition	45
2.2	Topography of the basins, reservoirs and command area	46
2.2.1	Topography and physiography	46
2.3	Geology of the basins, reservoirs and command area	54
2.3.1	Geology of the command area	58
2.4	River system and basin characteristics	60
2.4.1	Godavari basin	60
2.4.2	Krishna basin	63
2.4.3	Gundlakamma basin	64
2.4.4	Basin area of streams between Gundlakamma and Pennar	66
2.4.5	Pennar basin	68
2.4.6	Basin area of streams between Pennar and Palar	69
2.4.7	Palar basin	72
2.4.8	Basin area of streams between Palar and Cauvery	74
2.4.9	Cauvery basin	75
3	Inter-state aspects	
3.0	General	77
3.1	Godavari basin	79
3.1.1	State-wise breakup of catchment	81
3.1.2	Net water availability as per GWDT for Telangana/AP	83

Para no.	Description	Page No.
3.2	Various legal aspects on the link project	83
3.2.1	Sharing of Godavari waters among basin states	83
3.2.2	Submergence/PAPs and R&R	88
3.2.3	Existing and proposed projects between SRSP and Dowlaiswaram	89
3.30	Net yield at Janampet	91
3.4	Impact of link project on Tribunal Awards	91
3.4.1	Godavari Water Disputes Tribunal (GWDT) Award	91
3.4.2	Krishna Water Disputes Tribunal - II (KWDT II) Award	93
3.4.3	Pennar river	94
3.4.4	Palar river	94
3.4.5	Cauvery Water Disputes Tribunal (CWDT) Award	95
3.4.6	Supreme court verdict	96
3.5	Provision of water through link project	97
3.6	Impact of Godavari (Janampet)-Cauvery (Grand Anicut) link project on Peninsular Component	97
4	Surveys abd investigations	
4.1	General	99
4.2	The proposal	100
4.3	Additional surveys and investigations	101
4.4	Topographical surveys	102
4.4.1	Headworks	102
4.4.2	Canal	102
4.4.3	Cross drainage/cross masonry works	103
4.4.4	Command area	103
4.5	Geological investigations	104
4.5.1	Godavari (Janampet) to Krishna (Nagarjunasagar) (Reach-I)	104
4.5.2	Krishna (Nagarjunasagar) - Pernnar (Somasila) (Reach-II)	105
4.5.3	Pennar (Somasila) to Palar under Reach-III	107
4.5.4	Palar to Cauvery (Grand Anicut) under Reach-III	108
4.6	Geo physical investigations	108
4.7	Sub-surface geological explorations	109
4.8	Construction materials investigations	111
4.8.1	Soils	111
4.8.2	Fine aggregate	112
4.8.3	Coarse aggregate	113
4.8.4	Bricks	114

Para no.	Description	Page No.
4.8.5	Cement and steel	114
4.9	Soil surveys -Mapping of existing land use/land coverand irrigability	115
4.9.1	Soils	115
4.9.2	Land use/land cover mapping	115
4.9.3	Land use classification	116
4.9.4	Land irrigability classification	116
4.9.5	Land evaluation for crop suitability	119
4.10	Drainage survey	120
4.11	Communication surveys	121
4.12	Hydrological and meteorological investigations	121
4.12.1	Runoff	122
4.12.2	Climate	123
4.12.3	Rainfall	124
4.12.4	Temperature	124
4.12.5	Relative humidity	124
4.12.6	Wind speed	125
4.12.7	Cloud cover	125
5	Hydrology and water assessment	
5.0	General	126
5.1	General information about regions	127
5.1.1	Command area	130
5.1.2	Floods and drainage	131
5.1.3	River geometry	132
5.1.4	Groundwater recharge	132
5.1.5	Barrage area	133
5.1.6	Other water usage	134
5.2	Data availability	134
5.2.1	Rainfall and snowfall	134
5.2.2	Pan evaporation	135
5.2.3	Climatological parameters	135
5.2.4	River gauge & discharge	136
5.2.5	Sediment (suspended & bed load) inflow	136
5.2.6	Water quality	137
5.3	Water availability studies	137

Para no.	Description	Page No.
5.3.1	Methodology	138
5.3.2	Water balance studies considering only Indravati flows (Scenario-I)	140
5.3.3	Water balance studies considering only Indravati and Lower Godavari upto Janampetflows (Scenario-II)	145
5.3.4	Consistency of data	148
5.4	Effect on hydrologic regime of Lower Godavari sub-basin downstream of Janampet	150
5.5	Presentation of hydrologic inputs for simulation	150
5.5.1	Water inflows	150
5.5.2	Sedimentation studies	150
5.5.3	Potential evapotranspiration and rainfall	151
5.5.4	Flood inputs	151
5.5.5	Inputs for water quality	151
5.5.6	Low flow inputs	151
5.5.7	Surface to groundwater recharge	152
5.6	Simulation studies at Janampet	152
5.6.1	Time unit for simulation studies	152
5.6.2	Initial storage	152
5.6.3	Inflow series into barrage	152
5.6.4	Project demands	153
5.6.5	Simulation results	153
5.7	Design flood and diversion flood	154
5.8	Studies for design of drainage in the command area	154
5.9	Determination of levels for location structures on outlets	154
5.9.1	Location of outlets	154
5.10	Model studies	154
5.11	Minimum flow for environmental consideration	155
5.12	Effect of project on hydrologic regime	155
5.12.1	Impact on existing project in the downstream of planned project	155
5.12.2	Effect on low flows	155
5.12.3	Effect on flood hydrology	155
5.12.4	Effect on total runoff	156
5.12.5	River hydraulics	156
5.12.6	Sediment yields, carrying capacities, aggradation and degradation	156
5.12.7	Water quality	156
5.12.8	Water demand	156
5.13	Water allocation and inter-state aspects	156
6	Design aspects	
6.1	General	157
6.2	Geology, seismicity and foundation	159
6.2.1	Geology	159

Para no.	Description	Page No.
6.2.2	Seismicity	159
6.2.3	Foundation treatment	160
6.3	Barrage at Janampet	160
6.3.1	Design flood at Janampet	160
6.3.2	Hydraulic design of barrage	161
6.4	Head regulator	162
6.4.1	Head regulator at Janampet	163
6.5	Design of conveyance system	163
6.5.1	Canal alignment	164
6.5.2	Canal capacity	164
6.5.3	Design of canal	165
6.5.4	Tunnels	167
6.5.5	Lifting arrangements	170
6.5.6	Power house at offtake of link canal from Nagarjunasagar	174
6.5.7	Description of soil profile along the link canal	175
6.5.8	Evaluation of design parameters	175
6.5.9	Transmission losses	175
6.6	Canal structures	176
6.6.1	Cross drainage/cross masonry/regulators	176
6.6.2	Layout and foundation	176
6.6.3	Cross drainage works	176
6.7	Cost curves for cross drainage and cross masonry works	179
6.8	Integration of link canal with existing reservoirs and canals	179
6.9	Canal automation and branch canals	180
6.10	Instrumentation	180
6.11	Other studies	180
7	Reservoirs & enroute storages	
7.0	General	181
7.1	Fixation of storage and reservoir levels	182
7.1.1	Headworks	182
7.1.2	Intermittent/balancing reservoirs	184
7.1.3	Tail end structure	187
7.2	Sedimentation	189
7.3	Life of reservoir	189
7.4	Effect of link project on life of reservoirs	190
7.4.1	Nagarjunasagar reservoir	190
7.4.2	Somasila reservoir	190
7.5	Capacities and sufficiency of balancing reservoirs	191
7.6	Area of submergence	193
7.6.1	Janampet barrage	193
7.6.2	Nagarjunasagar reservoir	193
7.6.3	Somasila reservoir	194
7.6.4	Grand Anicut	194

Para no.	Description	Page No.
7.7	Evaporation losses	194
7.7.1	Janampet barrage	194
7.7.2	Nagarjunasagar reservoir	194
7.7.3	Somasila reservoir	195
7.7.4	Grand Anicut	195
7.8	Ecological releases	195
8	Irrigation planning and command area development	
8.0	General	196
8.1	Existing /proposed irrigation facilities in the proposed project command area	196
8.2	Proposed command area under the link canal	198
8.2.1	New areas proposed enroute the link canal	198
8.2.2	Stabilisation of existing commands	203
8.2.3	Net increase in irrigation facilities due to the link project	207
8.3	Existing cropping pattern	207
8.3.1	Existing area under rainfed cultivation	207
8.3.2	Existing area under irrigation	208
8.3.3	Source wise irrigation	208
8.4	Soil surveys	208
8.4.1	Soil capability classification	208
8.4.2	Land irrigability classification	209
8.5	Agro climatic conditions	209
8.5.1	Rainfall	210
8.5.2	Temperature	210
8.5.3	Humidity	210
8.5.4	Sunshine	210
8.5.5	Wind velocity	210
8.5.6	Evaporation	211
8.5.7	Cloud cover	211
8.5.8	Frost free days	211
8.6	Proposed cropping pattern	211
8.6.1	Approved cropping pattern	211
8.6.2	Cropping pattern adopted under the link project	212
8.6.3	Proposed irrigation facilities	212
8.6.4	Scope for double & multiple cropping pattern and change in cropping pattern	213
8.6.5	Attitude of farmers towards modern irrigated agricultural practices	213
8.7	Water planning	213
8.7.1	Irrigation water requirements	214
8.7.2	Domestic and industrial water supply	216
8.7.3	Transmission losses	218
8.7.4	Environmental releases	218
8.7.5	Evaporation losses	218

Para no.	Description	Page No.
8.7.6	Total water demands of the link project	218
8.7.7	Designed head discharge of the link project	219
8.7.8	Groundwater	219
8.7.9	Conjunctive use/groundwater support	220
8.8	Command are drainage	220
8.9	Water courses/field channels	220
8.10	Water managemnet	221
8.10.1	Participatory irrigation management including formation of water users association	221
8.10.2	Scope of introduction of modern technologies viz. sprinklers,drip irrigation etc.	222
8.10.3	Existing practice of department of agriculture for popularising micro irrigation	222
8.10.4	Facilities for training	223
8.10.5	Existing extension activity and proposal for improvement	223
8.11	Agricultural support services	223
8.11.1	Agricultural marketing	223
8.11.2	Development of horticulture	223
8.11.3	Organic farming	224
8.11.4	Minimum support price	224
8.11.5	Crop insurance	224
8.11.6	Agricultural credit	224
8.11.7	Use of improved seeds	225
8.12	Command area	225
8.12.1	Location	225
8.12.2	Classification of land	225
8.12.3	Size of land holdings	226
8.12.4	Climate of command area	226
8.12.5	Irrigatiion	226
8.12.6	Socio-economic aspects	227
8.12.7	Infrastructure facilities	228
8.12.8	Topography & soils	229
8.12.9	Groundwater drainage	229
8.12.10	Agriculture	230
8.12.11	Farmers' attitude towards improved agricultural practices	230
8.12.12	Identification of problems in enroutte commmand area	231
8.12.13	Proposed cropping pattern based on land irrigability classification etc.	232
8.12.14	Land development work proposals	232
8.12.15	Ayacut roads	232
8.12.16	Benefits	232

Para no.	Description	Page No.
9	Power	
9.1	General	235
9.2	Present status of power development	235
9.2.1	Telangana	235
9.2.2	Andhra Pradesh	242
9.2.3	Tamil Nadu	248
9.3	Power requirements	255
9.3.1	Power requirement of link canal	255
9.3.2	Power requirement of branch canals	257
9.4	Power potential of the link project	257
9.4.1	Power generation from canal head power house	257
9.5	Effect of link project on power scenario of States	259
10	Construction programme, manpower deployment and plant planning	
10.0	General	261
10.1	Objective of the project	261
10.2	Main components of the link project	262
10.3	Construction programme	263
10.4	Basis for study	264
10.4.1	General	264
10.5	Construction material sources	264
10.6	Basic consideration	265
10.7	Scheduled working hours	265
10.7.1	Construction period	266
10.8	Construction methodology and equipment planning	266
10.8.1	Proposed barrage	267
10.8.2	Main canal excavation	268
10.8.3	Tunnels	270
10.8.4	Lifts/power houses	272
10.8.5	Branch canals and command area	272
10.8.6	Proposed construction methods	272
10.9	Manpower planning	275
10.9.1	Organisation set up	275
10.10	Yearwise allocation of cost	276
11	Environmental impact assessment and environmental management plan	
11.0	General	277
11.1	Proposed project	278
11.2	Project description	278
11.3	Project justification	279
11.3.1	Study area	280

Para no.	Description	Page No.
11.4	Legal status of the project	280
11.5	Basic information	282
11.6	Environmental and ecological aspects of the storage reservoirs	283
11.6.1	Impact of Janmpet barrage	283
11.7	Impact of the link canal	285
11.7.1	Land use in the catchment area of the project	286
11.7.2	Land acquisition for the link canal	286
11.7.3	Groundwater	287
11.7.4	Surface water	289
11.7.5	Flood control	289
11.7.6	Pollution and industrial development	289
11.7.7	Aquatic life	290
11.7.8	Public health	291
11.7.9	Water logging and salinity	291
11.7.10	Climate and ecology	292
11.7.11	Natural resources	292
11.8	Labour	292
11.9	Sedimentation	293
11.10	Environmental status	293
11.10.1	Grounwater regime	293
11.10.2	Aquatic life	293
11.10.3	Tourism	293
11.10.4	Health hazards	294
11.11	Environmental impact	294
11.11.1	Surface water regime	294
11.11.2	Impact on groundwater	294
11.11.3	Aquatic life	294
11.11.4	Natural resources	295
11.11.5	Effect of water bodies	295
11.11.6	Aquatic weeds	295
11.11.7	Climatological changes	295
11.11.8	Impact on seismicity	295
11.12	Adverse impact of the link project	296
12	Socio economic studies, resettlement & rehabilitation	
12.1	Introduction	297
12.2	Socio economic profile and survey	297
12.2.1	Regional profile from the available secondary data	298
12.2.2	Project specific aspects	302
12.2.3	Short term impact of the link project	311
12.2.4	Long term impact of the link project	312
12.3	Resettlement & rehabilitation	312
12.3.1	Resettlement & rehabilitation package	312

Para no.	Description	Page No.
12.3.2	Project affected community	313
12.3.3	People's perception towards rehabilitation package	313
12.3.4	Measures for resettlement	313
12.4	Measures for rehabilitation	317
12.5	Local area development plan	317
12.6	Monitoring and evaluation	318
12.7	Beneficial economic impact	318
12.7.1	Beneficial impact of link canal	318
12.7.2	Employment generation during the construction of the project	319
13	Cost Estimates	
13.0	General	324
13.1	Classification of units	325
13.1.1	Unit-I Headworks	327
13.1.2	Unit-II Conveyance system	331
13.1.3	Unit-III Hydro power	338
13.1.4	Unit-IV Lifting arrangements	340
13.1.5	Unit-V Onfarm development	343
14	Revenues, benefit-cost ratio and IRR	
14.1	Yearly development programme	344
14.2	Sources of revenue	344
14.3	Direct benefits	345
14.3.1	Irrigation	345
14.3.2	Water charges	345
14.3.3	Domestic and industrial water supply	346
14.3.4	Power generation	347
14.3.5	Pisciculture	347
14.3.6	Animal husbandry	348
14.3.7	Canal bank plantations	348
14.3.8	Other benefits	348
14.4	Indirect benefits	348
14.5	Concession in water rates	349
14.6	Administrative charges for water supply and revenue collection	350
14.7	Redress of scarcity	350
14.8	Commencement of realisation of the revenue	350
14.9	Total income from various sources	350
14.10	Manpower for collection of revenue	351
14.11	Annual costs	351
14.12	Benefit-cost ratio	352
14.13	Internal rate of return	352
14.14	Benefit-cost ratio for flood control component	352
14.15	Role of the link project in the overall development of the region	352
15	Other aspects	

Para no.	Description	Page No.
15.0	General	354
15.1	Scope of the link project	354
15.2	Rights of beneficiary states	354
15.3	Benefits to Chhattisgarh	354
15.4	Sharing of water due to link proejct	355
15.5	CEIA studies	355
15.6	Piped conveyance	355
15.7	Reservoirs	356
15.8	Solar potential	356
15.9	Financial resources	356
15.10	Future utilisation of facilities created (buildings)	357
15.11	Role of the project in addressing the issues	357
15.12	Public cooperation and participation	357
15.13	Public awareness	357
